

Chart 1: Shows geographic and topical coverage of Current Intelligence publication in 1974.

NOTE:

- Far East most frequently covered area.
- Only 21% devoted to Warsaw Pact and China.
- Only 27% on military.
- 53% on political.

Chart 2: Shows geographic and topical coverage of monographs. State reasons higher percent on Warsaw Pact and China than current (35% versus 21%).

31% on economics, 29% on politics, and 17% on military.

Chart 3: Shows key sources for all topics and areas.

- Human Sources most frequent KEY source for both current and monographs.
- Mainly because of high political (international relations and domestic politics).
- Technical sources: confined to most difficult targets, mainly military.
- Open sources higher in monographs, because these are products of deeper research.

Chart 4: Shows more detailed breakdown by topics: ("Other" includes biographic, geographic, etc.).

- Technical sources highest for military and S&T.
- Open sources of high frequency for all but military.
- Human sources high for political reflecting both State and clandestine collection.

Chart 5: Shows more detailed by geographic areas:  
--High technical for USSR and China...  
and for Middle East for current.  
--Note other parts of the world not very  
different from Western Europe and

25X6

Chart 6: Shows more detailed on human sources,  
by topics:  
--Clandestine collection contribution  
substantial, but second to State in  
all topics except military and S&T.  
--Military and S&T not usually  
accessible by State and needs  
clandestine collection especially  
in Communist countries.

Chart 7: Shows more detailed on human sources,  
by geographic areas:  
--Geographic distribution as expected.  
--Clandestine collection highest on  
monographs on USSR and China.
